

CONSENT FOR TRIGGER POINT INJECTION, JOINT INJECTION AND
REGENERATION INJECTION THERAPY

Date

There are complications with any invasive procedure including **Trigger Point Injection, Joint Injection and/or Regeneration Injection Therapy**. These complications usually are dependent on the area of the body being injected, but not always. The complications are extremely rare and include, but are not limited to the following:

Bruising
Dizziness
Increased Pain
Itching
Nausea
Numbness
Infection
Allergic Reaction
Pneumothorax
Spinal Headache

If you have any additional questions, please feel free to discuss with **Dr. Enrique Umpierre**. If you understand this consent and all questions about this procedure have been answered in satisfactory manner, please sign below accepting these risks associated with **Trigger Point Injection, Joint Injection and/or Regeneration Injection Therapy**.
